

The July Meeting of the Templeton Light Commission shall be held on Tuesday, July 8, 2014 at the Light & Water Office. The Light Meeting shall start at 6:30 p.m. or immediately following the Water Meeting, whichever occurs first. The Light Commission shall be voting on whether or not to enter into Executive Session to discuss a competitively sensitive issue that shall address proprietary information associated with a potential solar generation project in town. This project could potentially lead to a purchased power agreement and the Light Commission believes that if it were to discuss such an issue in Open Session it would adversely affect the Light Plant's ability to effectively negotiate a purchased power agreement.

Light Commissioners' Meeting
July 8, 2014

AGENDA

Call to Order
Approval of Agenda
