

## **Templeton Municipal Light and Water Plant**

#86 Bridge Street Office **CLOSED** to Public until Further Notice

TO ALL TEMPLETON MUNICIPAL LIGHT AND WATER CUSTOMERS:

Effective on Tuesday, March 17, 2020 our administrative office and operations center located at #86 Bridge Street, Baldwinville, MA 01436 will be **CLOSED** to the public until further notice due to the COVID 19 problem. Only municipal light and water employees, light and water commissioners and cleaning staff will be allowed access into our facility other than for emergencies. Municipal Light and Water Customers are still able to call and make payments to us over the phone OR use our online bill payment system thru our department website at [www.templetonlight.com](http://www.templetonlight.com). We will still be regularly getting light and water mail AND checking the payment drop box located just outside our office for light and water payments (please do not leave cash in the drop box; use a money order instead of cash).

We apologize for this inconvenience to those Light and Water Customers who would typically conduct business with us here in-person. But given the current health climate in the region we feel that this temporary closing of our municipal facility is warranted.

Thank you.

John M Driscoll  
General Manager, TMLWP
